

# Shared Computer Activation (SCA) Program

---

## **What is Shared Computer Activation (SCA) for Office 365 ProPlus, Project Online Professional, and Visio Pro for Office 365?**

Shared Computer Activation (SCA) is a product activation mode that allows multiple Office 365 ProPlus, Project Online Professional, and Visio Pro for Office 365 users to share the same hardware. Office 365 is licensed per user, so SCA helps ensure that users accessing Office 365 ProPlus, Project Online Professional, and Visio Pro for Office 365 are licensed appropriately. With this mode, Office 365 ProPlus, Project Online Professional, and Visio Pro for Office 365 natively support RDS scenarios and it is no longer necessary to install MSI software as a workaround. SCA can be enabled in the following deployment scenarios:

- Customer dedicated self-hosted (on-premise)
- Windows Azure environment
- Dedicated third-party hosted

Multi-tenant third-party hosted scenarios are now permitted for shared computer activation (SCA) through qualified cloud partners that meet certain criteria.

## **What Office versions support Shared Computer Activation?**

Shared Computer Activation mode works with Office 365 ProPlus, Project Online Professional, and Visio Pro for Office 365. All [Office 365 plans](#) that include Office 365 ProPlus, Project Online Professional, or Visio Pro for Office 365 are able to use Shared Computer Activation.
